DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Christopher Bullard (Reg. No. 57,644) on 9/4/2008.

IN THE CLAIMS OF THE AMENDMENT DATED 8/25/2008:

In claim 1, line 16 after "bottom face," -- the back face being directly connected to the contact face, -- has been inserted.

In claim 44, line 13 after "," -- the back face being directly connected to the contact face, -- has been inserted.

In claim 46, line 1 before "apparatus", "image forming" has been replaced with -- sheet feeding --.

In claim 47, line 1 before "apparatus", "image forming" has been replaced with -- sheet feeding --.

In claim 49, line 1 before "apparatus", "image forming" has been replaced with -- sheet feeding --.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 44 in the Amendment of 8/25/2008, and as modified by attached examiner's amendment, are patentable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth, including a tilt member contact body with a contact face in direct contact with a sheet feed roller, a tilt face configured to be in contact with an edge of an uppermost sheet, a back face, a bottom face, and a front face, the contact face extending from the back face to the tilt face, the tilt face extending from the contact face to the front face, the back face extending from the contact face to the bottom face, the back face being directly connected to the contact face, and the tilt member contact body is made of a first material consisting of one of aluminum (A1), poly-ether-ether-ketone (PEEK), polyimide (PI), and an alloy that contains polyimide (PAI); and a tilt member support body made of a second material different from the first material, the second material consisting of one of an ABS resin, polyacetal (POM), polybutylene terephthalate (PBT), and polycarbonate (PC), wherein the tilt member support body includes a support face and a top face that extends substantially perpendicular to the support face, and wherein the back face of the tilt member contact body directly contacts the support face of the tilt member support body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
